Totalt 23 individer av 7 arter.

Ringmärkare: KWL, YUN,

MGA, ESR, CJT, HLD,

FOG, BRG, AJO, JMS, MSI,

GSL, FMN.

DIVERSE:

STTG: Another bullfinch today! And at the same time, in the same net, a great-spotted woodpecker, only the 2nd one this autumn. FOG placed all of his SigFox tags on blackbirds, so that's it for that project!

AND: 9 mallards ringed and plenty controlled.

Div: We finally have a decent-sized flock of brents in the garden, and sometime in the afternoon while FOG and GSL were out looking for jack snipes, they managed to herd them like sheep into A-trap! They're lovely birds and quite fun in the hand. In total it was 7 brents and 1 barnacle goose. BRG also had a sparrowhawk in krattet in the afternoon, and GSL heard a magpie at the cape. YUN left, not before we took a nice group photo of the autumn team. MSI made really nice japanese dinner, and GSL filmed the evening for his upcoming film project.
