Fyrträdgården:

Vitkindad gås 50, prutgås 8, sparvhök 1 1k hane

Vinterhämling 1

Snösparv 2

Totalt 3 individer av 2 arter.

Ringmärkare: JMS, ALD, FOG, MGA, KWL.

DIVERSE:

Div: Finally a day without wind! Early in the morning JMS attempted trapping twites and snow buntings and found success: the first and only twite of the year was trapped as well as 2 lovely snow buntings! The duck trap was taking down which didn't actually take as much time as we thought it would: in less than 3 hours we got everything done. Later in the afternoon we did a lot of cleaning at the station and burnt the last of the duck boxes. The farmer brought the duck lab back to the station with a truck.
